

Session: Open Collaboration onUBA/Probas-Update

Clemens Wingenbach (ifeu), Hendrik Lambrecht (INEC)

BrightCon 2026, Aalborg, 25.09.2026

F5 – Plenum Discussion: Collaboration on Open Data

Session Outline

- **Introduction** (5 min.) – Motivation and Objective
- retrieval augmentation input: A **Collaborative Systematic Review of LCA data formats**: Benefits, Limitations, and Silos (Robin Dethienne, Université catholique de Louvain) (10 min.)
- retrieval augmentation input: The **BAFU LCA Database: Origin and perspectives** (Pierryves Padey, FOEN/BAFU/OFEV/UFAM) (10 min.)
- Discussion in **break-out groups**, see details below (30 min.)
- Plenum **Wrap Up** (15 min.)

R&D Project: UBA/Probas-Update

Objective: a substantial „upgrade“...

... towards an LCA reference database for Germany

Freely available, quality-assured, representative, transparent, harmonised, up-to-date and updatable

- **Adaptation of the BAFU database to German market and process conditions**
- Development of a transparent and reproducible **adaptation workflow** that enables the UBA to carry out updates independently
- Closing data gaps through **120 new activity data sets** for circular economy processes, products and services
- **Provision of the validated standard processes** in ProBas and as a supplement to the BAFU database in **ILCD** format

Objective for this workshop

catalyst for Brightcon 2026 findings with respect to UBA-Probas+

- **Collect ideas** of hackathon and conference
-> group discussion... as a start
- **Focus** on those approaches, which seem most useful, easy to implement ...
... in view of an operational platform for collaboration in the upcoming project
- **Continuity:** we propose, in the context of UBA-Probas+ to follow up on / moderate these topics
